PROFILE

I am a frontend developer with 2.9 years of expertise in React JS, committed to pushing conventional boundaries to create innovative web and mobile solutions that elevate the technological experience. I have successfully led a team of 6 individuals on multiple projects, consistently delivering state-of-the-art solutions.

CORE COMPETENCIES

Frameworks

- React JS
- React Native - Expo, native CLI
- Angular JS
- Next JS

Development Kit:

- Preprocessor - SASS
- Library - Material UI, Angular Material, Tailwind, Ant design, Chart JS, Shadcn
- Database - Firebase, Prisma, tRPC, postgresql, Zod
- State Management: Redux.js, React Query

Web Development

- CSS3
- HTML5
- Typescript
- Javascript
- JQuery
- RestFul API

Version control

- GIT

IDE

VS code

WORK EXPERIENCE

Junior Software Developer

April 2022 - Present

BYTECOMPASS LLP, MADURAI

Technology : React Js | React Native | Next Js | Angular Js | Javascript |
Typescript | Firebase | REST | Git

PROJECTS

KLAЕ.AI - <https://app.klae.ai/>

Website builder - that lets users import any site with a URL and start customizing right away. With AI-driven content and easy design management, users can export clean HTML and CSS hassle-free.

My Work:

Integrating OpenAI's language models, I developed a comprehensive, user-friendly editor with intuitive features like image editing, section management, and drag-and-drop functionality, enabling direct code access - a robust tool pivotal to Klæ's success.

Tech used: React JS, monaco-editor, Dnd core, SASS

VERDURE

HealthTech Application - that automates CPT code management to help hospitals streamline medical billing and boost operational efficiency.

My Work:

I independently developed the MedTech project, handling CRUD operations for CPT codes, creating dashboards, and implementing a bulk upload feature. I also integrated chart functionality to visualize the data, making the platform more efficient and user-friendly for managing medical codes.

Tech used: Angular Js | Ng-Zorro | Angular-Material

INVESTO

Fintech Application that performs investment analysis and creates strategies for users to suffice their financial goals.

My Work:

In addition to my general development responsibilities, I have successfully steered the project through the entire end-to-end process, overseeing all stages from initial planning to final delivery.

Tech used: React Js | Ant Design | React Native

RAPIDLOOPS

Logistics - Enables tracking and managing logistics across various truckers and owners through a single platform.

My Work:

I was responsible for a range of tasks including developing user interfaces, fixing bugs, and adding new features. I also optimized performance code to ensure efficiency and reliability. Additionally, I transformed existing codebases into maintainable and scalable solutions, improving overall project sustainability and ease of future updates.

Tech used: React Js (class) | Ant Design | Figma

PRISM

HR Management - in which they were looking for a provider who can build an end to-end HR management system for contract and daily wage workers

My Work:

Efficiently guiding projects from phase 1 to phase 2, skillfully managing all aspects from detailed planning to successful delivery in the comprehensive end-to-end process.

Tech used: Firebase | React JS | React Native

EDUCATIONAL QUALIFICATION

B.E in Mechanical Engineering	2017 - 2021
Government College of Engineering, Salem	
CGPA - 8.01	

Higher Secondary	2016 - 2017
S.R.V Higher Secondary	
Percentage - 96%	

I here by declare that all the information provided are true and correct to the best of my knowledge
